Summary

Results-driven **Software Developer** with extensive experience in **full-stack web development** using **Go (Golang), JavaScript, TypeScript, Node.js, React, Docker, Git, MongoDB, SQL, Redis, and Kafka**. Skilled in building, testing, and deploying **microservice-based, event-driven** systems and **scalable web applications**. Proven track record in collaborating within **Agile teams**, leading development efforts, and delivering high-quality, production-ready solutions for large-scale environments.

Experience

Software Developer | Pasha Bank

Oct 2024 – Present

- Develop and maintain **large-scale banking applications** serving millions of users.
- Design and implement **microservices** using **Go (Golang), Node.js, Kafka, and Redis** for high-throughput, event-driven systems.
- Collaborate with product, QA, and DevOps teams in an **Agile/Scrum** environment to deliver new features efficiently.
- Participate in **code reviews** and enforce high development standards.
- Mentor junior developers and assist in improving code quality and performance.

Software Supervisor | Socar Trading

2023 – Oct 2024

- Led a software team in developing enterprise-grade solutions using **Go (Golang), JavaScript, Node.js, React, Docker, Git, SQL, Redis, and Kafka**.
- Designed and deployed **microservice architectures** supporting event-driven data flows and real-time updates.
- Collaborated with stakeholders to define technical requirements and deliver robust backend systems.
- Managed project scope, resources, and timelines while maintaining high performance and reliability.
- Conducted detailed **code reviews**, implemented best practices, and mentored junior developers.

Software Developer | EiLink R&D

2022 – Oct 2024

- Worked as a **frontend** and later **full-stack developer** on a supply chain management platform.
- Built backend services using **Go (Golang)** and **Node.js**, and user interfaces with **React**.
- Integrated **Kafka** for real-time communication and **Redis** for caching and system performance.
- Implemented **microservice architecture** and built a **notification socket service** using Go and MongoDB.
- Collaborated in an **Agile** environment with cross-functional teams to deliver production-ready features.

JavaScript Developer | AT-Geotech

2021 – 2022

- Developed an **ERP system** using **React, jQuery, and SQL**.
- Participated in code reviews and ensured adherence to best coding practices.
- Designed efficient front-end workflows and collaborated with backend teams for smooth integration.

Frontend Developer | Meal Ordering Startup

2021 – 2023

- Built a **merchant web application** similar to Uber Eats using **React, Redux, and Ant Design**.
- Delivered more than 90% of the product's frontend features independently.

- Supported and maintained the application post-launch, resolving bugs and adding new functionality.
- Collaborated closely with designers and backend developers to enhance performance and UX.

Skills

Programming Languages & Frameworks:

Go (Golang), JavaScript, TypeScript, Node.js, React, React Native, Redux, React Query, Express.js, Knex.js, Python

Databases & Storage:

MongoDB, SQL, Redis

Messaging & Streaming:

Kafka

Tools & DevOps:

Docker, Git

Architecture & Methodologies:

Microservices, Event-Driven Architecture, RESTful APIs, Agile/Scrum

Core Strengths:

System design, performance optimization, scalable backend development, code quality, collaboration, and mentoring.

Education:

- Master of Regulation of Economy, Baku State University, Baku, Azerbaijan (2017-2019)
- Bachelor of Economy, Nakhchivan State University, Nakhchivan, Azerbaijan (2013-2017)
